CAMBRIDGE SYSTEMS INC.
NAMCOR

Contract Areas

Contract and task order management is a mandatory element for all task orders placed under the CIO-SP2 *i* contract. The objective of contract and task order management is to provide the program management, project control and contract administration necessary to manage a high volume, multiple contract type task order process for a large, diversified team so that the cost, schedule and quality requirements of each order are tracked, communicated to the government, and ultimately attained. The use of commercially available automated tools (for example – a LAN or web based contract task management system) and the application of expertise on processes and metrics that support task order management are encouraged to achieve the above objectives. The objective of the tools is to provide quicker access, improved accuracy, and enhanced accessibility for contractors/clients, real-time monitoring of status/deliverables, tracking the quality of work products and gauging overall customer satisfaction.
