- Source planning and selection
- Contract award and administration
- Life cycle monitoring

Value Added Benefits

- Expert formulation and execution of IT and professional acquisition solutions
- Customized value added services
- Competitive pricing through skilled negotiators
- Comprehensive acquisition services
- Ability to handle any ceiling threshold

Let us help you with your next acquisition project. For more information on partnering with NITAAC Assisted Acquisition Services, contact us today!

“Best Fit” Makes the Difference

When you choose **NITAAC Assisted Acquisition Services**, we begin by determining the “best fit” for you. That means pairing the right contracting officer with your requirements based on the size and/or complexity of the job, the culture of your organization, the acquisition strategy necessary, and the contracting vehicle selected.

Once we determine the fit, we support you with warranted, FAC-C Level-III certified contracting professionals who handle your complete procurement life cycle from market research to closeout. Using agile acquisition techniques, NITAAC fulfills mission-critical IT objectives for federal civilian agencies; crafting compliant solutions that deliver on time and within budget.
