Chief Information Officer – Solutions and Partners 3

The Chief Information Officer – Solutions and Partners 3 Government-Wide Acquisition Contract is a 10-year Indefinite Delivery/Indefinite Quantity contract valued at $20 billion. This contract is intended to provide custom information technology (IT) solutions and services.
Explore the ten task areas below to find out if CIO–SP3 is right for you.

1. IT Services for Biomedical Research, Health Sciences, & Healthcare
   The objective of this task area is to support Biomedical research, Health Sciences and healthcare by performing studies and analyses, and providing operational, technical, and maintenance services for the systems, subsystems, and equipment, some of which interface with, and are extensions to, information systems throughout the federal government.

2. Chief Information Officer Support
   The objective of this task area is to support Chief Information Officers (CIOs) in implementing laws, regulations, and policies and to facilitate evolving CIO practices.

3. Imaging
   The objective of this task area addresses systems and services that support the collection, storage, and retrieval of digital images. Digital images can include scanned documents, medical images, geographical information systems, video and photographs.

4. Outsourcing
   The objective of this task area is to provide the Information Technology (IT) infrastructure and IT services required to assume management and operations of government IT resources and IT business functions.

5. IT Operations & Maintenance
   The objective of this task area is to provide the Information Technology (IT) infrastructure and IT services required to assume management and operations of government IT resources and IT business functions.

6. Integration Services
   The objective of this task area is to support the development and deployment of integrated information systems, which includes the integration of technical components, information technology components, organizational components and documentation. Integration projects can support a wide range of agency functions. In the healthcare and research domain, medical imaging systems, patient management systems, clinical management systems, and laboratory management systems are often provided via integration of commercial components with existing infrastructure.

7. Critical Infrastructure Protection & Information Assurance
   The objective of this task area is to support the protection of critical infrastructure, assurance of agency information, and operations that protect and defend information and information systems by ensuring confidentiality, integrity, availability, accountability, restoration, authentication, non-repudiation, protection, detection, monitoring, and event react capabilities.

8. Digital Government
   The objective of this task area is to support government services that are provided through digital, electronic means, creating a transparent interaction between government and citizens (G2C – government-to-citizens), government and business (G2B – government-to-business) and government interagency relationships (G2G – government-to-government).

   The objective of this task area is to support the implementation of enterprise management applications and systems in the federal environment, which are integrated software applications used to control, monitor, and coordinate key business activities across an enterprise. These applications generally fall into the following categories: Financials, Human Resources, Logistics, Manufacturing, and Projects.

10. Software Development
    The objective of this task area is to develop customized software applications, database applications, and other solutions not available in off-the-shelf modular software applications.
